Rising Above the Rest

Education

Education is a number one priority to Kencor. All of our elevator mechanics are certified. They go through four years of classroom lessons and on the job training to become certified elevator technicians (CET). The lessons focus on industry codes and compliance, installation components, maintenance and troubleshooting procedures. Over the years, Kencor has

implemented several instructional opportunities and have invested in the employee's education. The mechanics skills and knowledge not only benefit Kencor, but they benefit you. We strive to be competitive and knowledgeable and education is the best way to achieve that goal.

Tip of the Quarter

According to ASME A17.1, every elevator must have a means of two-way communication. Telephone, intercom or an alarm bell are all acceptable forms. In buildings that do not have an attendant to respond to emergency situations, the elevator has to have a communication device inside the car. To be compliant make sure your elevator has working communication. Telephones should have a designated phone number and be programmed to

call an answering service or emergency personnel. Develop a plan in case an emergency may arise and make sure we have your emergency contact information. If you have any questions please contact us, we are happy to help.

With Your Help

Kencor's new survey has been a huge success. We have received valuable thoughts and opinions that we are using to improve our company. We hope that you continue to give us feedback on our website. As an added incentive, we will have a drawing that will occur on the 25th of every month. Those who have participated in the survey could get picked to receive \$50 off their monthly maintenance.
