

WHEN SHOULD YOU CALL FOR SERVICE?

ELEVATOR SAFETY

Assess your equipment for these fundamental elevator safety failures.

If your equipment meets **any** of these criteria, please call Kencor, Inc. to correct the problem.

Remember, do not attempt to fix elevator safety failures on your own. Arranging for service now promotes safety and protects the life of your equipment.

PHONE

If your elevator phone does not have a 24-hour/7-day-a-week operator on the other end.

DOORS

If your elevator doors do not have an electronic detector to reopen doors.

MAINTENANCE

If you do not have a preventative maintenance program that provides regular, systematic visits.

LEVELING

If your elevator is not level with floors when it stops.

RETURN

If your elevator does not return to the lowest landing and open its doors during a power failure.

LIGHT

If your emergency light does not work when there is a power failure.

BELL

If your emergency bell does not work, or if others outside of the elevator cannot hear the bell's sound.
